

ACORN VOTES

FEDERAL ELECTION 2021

The pandemic has exposed and entrenched the deep inequities in Canada. Job loss during the pandemic hit lowest wage workers the hardest and the need for government to provide and expand basic services and programs was needed and understood like no other time in this generation. It is now time for us to rebuild, putting people before profits. With the federal election around the corner, ACORN members in 24 of the lowest income neighbourhoods across the country met, discussed and developed ACORN's National Platform.

ACORN members demand the following:</p> <ol style="list-style-type: none">1. Protect Existing Affordable Housing<ol style="list-style-type: none">Federal funds should be used to protect housing and not destroy affordable housing by gentrifying affordable housing and renovating/demovicting sitting tenants. CMHC needs to put affordable housing preservation conditions on all financing agreements with developers.<ul style="list-style-type: none">• Immediately end the tax exemptions to Real Estate Investment Trusts or REITs by closing the tax loophole in the Income Tax Act.• Create a national non-profit acquisition strategy by funding and giving non-profits and co-operatives the right of first refusal on all apartment building sales and provide them with capacity building resources to participate in the market.Immediately mandate full rent control in all provinces.Create a rent relief fund so that people falling through the cracks are not evicted for not being able to pay rent.2. Build new and deeply affordable housing<ol style="list-style-type: none">Build a minimum of 1.2 million units of affordable housing in the next decade.The federal housing initiatives must target people in core housing need. The affordable housing programs delivered through the CMHC must ensure that any money given to developers is contingent on these conditions:<ul style="list-style-type: none">○ it targets people with household income between \$10,000 and \$30,000/ year;○ the housing is kept affordable for perpetuity (not 21 years as currently done).
 Fair Banking/End predatory lending	<p>The failure of banks to serve low-and-moderate income people is leading to massive growth of predatory lenders that charge 60%-500% interest, depending on the size of the loan.</p> <p>ACORN members demand the following:</p> <ul style="list-style-type: none">• Lower the criminal interest rate from 60% to 30% for installment loans. Ensure it includes all: Fines, fees, penalties, insurance, or any related cost. Including NSF fees.• Lower the NSF fees from \$45 to \$10.• The federal government must mandate banks to (1) provide an affordable loan for low and moderate income people back-stopped by the government and (2) support Postal Banking. People need low interest alternatives so they can avoid predatory lenders.
